

ABOUT THE PROJECT

We are currently developing an Android & iOS mobile application for a French client. The app facilitates last-minute meetings between close friends. The user can open the app, see their list of friends on the map and select who they want to meet. They can also select what they want to do: meet for coffee, lunch or go out for drinks after work.

The app is written in React Native and uses Firebase on the backend. We used JavaScript both on the frontend and for the Firebase Cloud Functions. It contains unit tests for the main functionalities of the app. Almost half of the app is ready, we need help from an experienced developer to finish the app. The project will last 4-6 weeks and will require 20-30h/week.

WHAT WE ARE LOOKING FOR

We are on the lookout for a freelance React Native developer. The suitable candidate will be responsible for the development of the remaining features of the app. He/she will work closely with our founder. We expect the remaining features to be completed in about 4-6 weeks from the moment we start collaborating on the project.

The app is written in React Native and uses Firebase on the backend. We use JavaScript both on the frontend and for the Firebase Cloud Functions. The app includes unit tests for the main functionalities. Almost half of the app is ready; we need help from an experienced developer to finish the app.

The suitable candidate should have:

- 1-5 years' work experience with React Native
- Solid work experience with Git
- Remote work experience (this is a fully remote role)
- Great time management skills
- 20-30h/week availability for 4-6 weeks
- Work experience with Jest/Enzyme

Nice to have:

- Background in iOS and/or Android mobile development

- Work experience with Firebase

WHAT'S IN IT FOR YOU

- The chance to work on an app that will make a dent in the social networking space
- Work on your own schedule, from wherever you like
- Own every aspect of the frontend development
- Focus on the work, not on endless meetings and changing requirements
- We are looking for a collaborator who will work with us for the long term

RECRUITMENT PROCESS & TIMELINES

We are looking to start as soon as possible. As a first step, we'll want to see some code that you have written. If it makes us smile, we'll schedule a call for you to meet our founder, Narcis, and discuss techie stuff. If it's a go from both sides, we'll sign the contract and get to work. 🚀
